

First of all, I would like to thank our **Professor Felicito Angeles Jabutay** because he has given us a lot of opportunities to acquire much knowledge. I have learned most about many different kinds of thinkings in this class. For example, convergent and divergent thinking techniques, I am sure that, these kinds of thinkings are really crucial for path of my life growth. Because it gives me a realization of creative thinking and involvement to think differently with others, and it's also important for finding well solution to problems.

As a human, absolutely, I may be got fear of failure and can face many barriers to think creatively but after I have learned about the strategies to overcome barriers and fear of failure from this class, I feel myself very confident and I think, I can reframe failure as a learning opportunity in my future progressive life.

Another one I love the most that I have learned from the class is "Design thinking Process". For instance, the Ideate Phase, undeniable this is very useful thinking for me to expend the scope of solutions in my future learning.

Secondly, I have acquired valuable way in description our views, it is "Visual communication". When we have got a situation to present project presentation or communicate with people, we can use visual communication effectively that makes our audiences easy to understand our points. So, this is also absolutely useful for my future workplaces.

Finally, I have learned about Moscow method in this class as doing everything judiciously. So, these all things are genuinely useful for my academic pursuits and my future life in workplace. Moreover, it would reflect on my every decision, like decided something by thinking about advantages and drawbacks of what I am going to decide rather than intuition.
